

I am sending this message to express my disappointment with the National Association of Broadcasters attempts at stifling competition. I urge the FCC to reject NAB's petition 04-160. I am a loyal XM Radio customer and I prefer XM Radio over my locally available stations (except National Public Radio, which XM does not carry). I have multiple units and love XM Radio's quality content and superior transmission quality. Instead of attempting to limit competition, NAB should encourage its members to work harder to become more competitive. Again, please reject NAB's petition 04-160. I want XM Instant Traffic and Weather, as well as any other local programming they can acquire.

Thanks for considering this request.

Stan Mattos
